a Product of BSD Infotech Pvt. Ltd.

Customized Settings:

Company Details: You can customize the name of your company and contact details that will appear on invoices and challans.

Tax Information: You can enter your VAT, CST, Service Tax Nos. etc as you want it to appear on your invoices. You can leave it blank if you do not wish to use tax information.

Notes: Notes will appear at the bottom of Invoices. You can use these lines for Instructions, Terms & Conditions etc.

Invoice Header: This header will appear on topmost line of your invoice. You can use terms such as INVOICE, TAX INVOICE, CASH MEMO Etc. Or you can keep this field blank, if you do not want anything to appear on top.

Email Settings: Customized settings for smtp email sending of invoices.

LOGO: You can insert your company logo which will be printed on your invoices, challans, statements etc

Backup-Restore: You can backup all your data on a pendrive or any other source just by clicking the backup button. You can also restore all your data by just clicking the Restore button

Automatic Calculations: All the Calculations are done automatically. This saves you a lot of time and effort.

Automatic Price Options: While preparing invoices there are 2 price options. One is "Normal Prices" and the other is "Customer Specific Prices".

Normal Prices: Under this option, the prices are same for all the customers. While preparing invoices if you select this option, the normal price that you enter in your products master table will be automatically filled in the price column.

Customer Specific Price List: Suppose if you have many products and many customers. And different customers have different prices for different products. Here it is very difficult to remember prices for various products for various customers and enter them manually. But our software has the ability to remember different prices for different customers. You only need to feed them once. Than whenever you prepare a invoice for a particular customer, the price belonging to this customer will automatically be entered in the price column. You can edit or alter it manually also. This feature is not available in any other invoice software.

Automatic Amount in Words: Total amount of an invoice is automatically converted in words and printed on the invoice.

Automatic Emailing: Simply press the "Send Email" button. The Invoice will be automatically emailed to your Customer as an attachment in PDF Format. You can also customize the message and subject of this email.

Save As PDF File: You can save each and every Invoice as a PDF file just by clicking the "PDF" button.

View / Search & Filter: You can view a list of all Invoices prepared. You can also search and filter them on the basis of Date, Number, or Party Name. And from here you can directly take a printout or send it by email, just by clicking a button.
